

# Reinforcement Mesh

**Description:** The brittle nature of acrylic denture base material makes the dentures vulnerable for breakages and midline fracture. MAARC reinforcement mesh golden colored or plain Stainless Steel, are made using 316 grade stainless steel. The thickness of the reinforcement mesh is less than 0.25mm, the close perforations in the mesh aid in acrylic homogeneity and easy adaptability. Making the denture virtually unbreakable when the reinforcement mesh is sandwiched between layers of acrylic, during processing the dentures.

Re-inforcement Mesh is made from 316 grade stainless steel plated with gold or plain polished. Thickness- 0.25 mm - Golden and Silver.

Packing	Product Code
Golden Pack of 10 Pcs	5502 / 010
Silver Pack of 10 Pcs	5501 / 010

**Intended use / Indications:** Reinforce the denture and reduces the chances of midline fracture of the denture.
