

Retention Mesh

Slender shape with high stability is one of the requirements met superbly by these retentions.

Important Aspects: the complexity of wax-up is reduced, thus saving time, and the partial denture prosthesis acquires optimal stability and wearing comfort. The grid retentions with holes can also be integrated very well as reinforcing grids in total maxillary dentures made of plastic.

Packing	Product Code
10 Pcs	2952/010

Intended use / Indications:

These waxes are primarily used in the wax-up technique; this can include sculpturing, build up and inlay work.

Properties & Advantages:

They have an optimal anatomical shape and are made of easily adapted wax. Adhesion to the investment material model is optimal.

Shelf life and storage:

- Store at Temp between 10°C to 30°C
- Best before 60 months under proper storage
